

# THE FOUR ESSENTIAL GUN CLEANING STEPS

To achieve maximum results, we recommend the following 4-step guidelines. For those of you who are accustomed to using a C.L.P. (Clean, Lube & Protect product), we recommend using our FP-10™ Lubricant Elite.

## CLEANING THE BORE OR THE SHOTGUN BARREL

Most rifles & pistols have, what is called a rifled bore. It is essential to clean and remove fouling build-up from this bore with a bore cleaner, using a quality phosphor bronze brush.

### TIP #1

If cleaning a shotgun, the powder and plastic wad residue build-up, which is not visible to the naked eye, must be removed from the inside of the barrel and choke tubes. Our original **MC#7 BORE CLEANER** and **XTREME CLEAN BORE CLEANER** both work very well. We do, however, highly recommend using our **SHOTGUN & CHOKE TUBE CLEANER**, because of its unique and powerful formula. It is more effective at melting the plastic wad fouling and much easier and faster to use due to its convenient aerosol package.

Both our **MC#7 BORE CLEANER** and the **SHOTGUN & CHOKE TUBE CLEANER** are very effective at cleaning Inline Muzzleloaders and removing the plastic & carbon residue from sabot ammunition.

### TIP #2

For stubborn jobs, such as heavy copper build-up, use our **COPPER REMOVER** after first using the **MC#7 BORE CLEANER**, **XTREME CLEAN BORE CLEANER** or **AQUA CLEAN BORE CLEANER**.

For heavy lead build-up, we recommend using our **LEAD REMOVER** solvent.

## Suggested Products

- MC #7 Bore Cleaner and Conditioner
- Xtreme Clean Bore and Action Cleaner
- Aqua Clean Bore Cleaner
- Shotgun and Choke Tube Cleaner
- Copper Remover
- Lead Remover

## CLEANING THE ACTION

After cleaning the bore, the action needs to be cleaned/degreased. Apply a small amount of bore cleaner of your choice. Using a nylon bristle utility brush, gently scrub the parts to loosen residue from all areas of the action, receiver and trigger assembly.

Spray the action cleaner/degreaser on the action to flush away solvent, fouling, old lubricant and residue. (**ALWAYS RE-LUBRICATE AFTER DEGREASING/CLEANING**)

### TIP #1

Although all of our degreasers perform the same job, you'll want to use our **POLYMER SAFE QUICK SCRUB** or our **AQUA CLEAN DEGREASER** for firearms that have synthetic/polymer stocks, frames, receivers, parts etc.

### TIP #2

**QUICK SCRUB III** can be used, but if not used as directed, it could be harmful to painted surfaces, plastics, polymers and wood finishes.

### TIP #3

For a non-hazardous, environmentally-friendly alternative, use our **AQUA CLEAN FIREARMS ACTION CLEANER/DEGREASER**.

## Suggested Products

- Quick Scrub III Cleaner/Degreaser
- Polymer Safe Quick-Scrub
- Action Cleaner (PSQ) Aerosol
- Aqua Clean Action Firearm Cleaner/Degreaser

## LUBRICATING THE ACTION AND MOVING PARTS

After cleaning/degreasing the action, lubricating the moving parts of the firearm is necessary. **FP-10 LUBRICANT ELITE™** is best for closer tolerances and most general lubrication needs and can also be used as an effective C.L.P.

For areas that have wider tolerances or areas that you need lubrication to adhere to under heavy demands and/or extreme heat, our **ALL WEATHER HIGH-TECH GREASE** is highly recommended.

Both lubricants can be used on different parts of the action, within the same firearm.

## Suggested Products

- FP-10 Lubricant Elite
- Synthetic All-Weather High-Tech Gun Grease

## PROTECTING THE FIREARM

To help protect firearms from rust and corrosion, apply our famous **FP-10 LUBRICANT ELITE™**.

To further enhance protection, **RUST PREVENT** is highly recommended on all metallic surfaces. It will displace moisture and ensure a greater chance of keeping the gun from rusting, corroding and pitting. In addition, it will effectively neutralize the acids from airborne salts, fingerprints and perspiration contact.

Shooter's Choice **RUST PREVENT** can and should be applied over our **FP-10™**.

## Suggested Products

- Rust Prevent Corrosion Inhibitor

Shooter's Choice offers a broad range of firearm maintenance products and bore cleaners. Each is specifically formulated to remove all types of fouling and residue, as well as providing various options for lubrication and protection for your firearm(s).
